

Enabling Technologies Unified Communications Project Manager Position

Enabling Technologies Corporation is the 2015 UC Partner of the Year award winner for Microsoft. While we've been in business for over 24 years, our last nine years have been spent deploying OCS/Lync/Skype for Business Server and Exchange, with a specific focus on Enterprise Voice (VoIP) and Exchange Unified Messaging. Lync/Skype for Business and Exchange deployments may be on premise or in the cloud (Office 365). Both involve knowledge of Microsoft applications, data network, and voice technologies.

We need a very technical project manager (more technical than PMI-type) to scope and then deliver the projects he/she scoped.

Must have:

- Technical aptitude in or hands-on familiarity with Active Directory, DNS, certificates, Microsoft Exchange, and Microsoft Lync and Skype for Business, and Office 365
- Ability to perform pre sales design of Microsoft Solutions for Exchange and Skype.
- Good phone skills – lots of teleconferences
- Ability to work with sales team to qualify clients and write Statements of Work
- Have worked as a consultant or vendor project manager
- Ability to multitask 15-25 customer projects or more simultaneously
- Comfort working in fast-paced, small company environment

Nice to have:

- Lync/Skype for Business or Exchange administration or design experience
- General Telephony skills or PBX administration experience
- Core Exchange design and configuration experience
- Office 365 administration experience
- SharePoint administration experience
- Azure PreSales Technical experience

This is a work-from-home position with less than 10% travel required.
